

FAST-PASS® **PASSPORT READERS**

ROCD0002

3M-AIT Full Page Reader Passport Reader

If images are critical to your operations, choose the 3M Full Page Reader. In addition to performing OCR, this flexible device captures an image of the full page of a travel document in infrared (IR) and visible illumination, as well as (optionally) ultraviolet (UV) light. Full color images of the document data page, or an isolated photo of the traveler, can also be saved in JPG format. The 3M Full Page Reader is also easy to use. Its ability to automatically detect the presence of a document, as well as the document type, means your inspectors can focus on travelers—and not on the operation of the reader.
